EDUCATION

Trinity College
Bachelor of Science in Computer Science

Connecticut, USA
Graduated May 2023

EXPERIENCE

Buyuk Filo - Long Term Corporate Car Leasing (Premium Service / Fleet Management)
Systems Analyst

Istanbul, Turkey
August 2024 - Present

- Analyzed internal processes to improve problem areas for data flow within the company.
- Implemented Microsoft Power Tools (**PowerBI**) along with other Fabric applications using **DAX** to ensure data quality and increase readability for company executives.
- Designed and implemented a **SharePoint** site for document management, ensured a seamless transition from a locally hosted file storage using SharePoint **PowerShell cmdlets**.
- Designed a comprehensive database to store all company data and a data entry UI for ease of use, co-ordinated the implementation of these designs with the software development team and performed user tests.
- Built the company-wide **Power BI** reporting environment across finance, sales, procurement, fleet operations and management reporting, including **KPI** tracking, executive dashboards and recurring performance monitoring.
- Designed and built the company **pricing system** for long-term vehicle leasing, standardizing pricing logic and bringing key commercial and financial inputs into a consistent decision-making model.
- Oversaw the operational and regulatory transition following the acquisition of a leasing company, coordinating the transfer of documentation, reporting responsibilities, system access and corporate records across internal and external stakeholders.
- Managed compliance and regulatory handover workstreams involving **BDDK**, **MASAK** and **Risk Merkezi/KKB**, including required notifications, governance documentation, account/access transitions and the transfer of periodic reporting processes.
- Coordinated cross-functional implementation and transition projects with finance, accounting, legal, external advisors and software vendors, translating business requirements into structured workflows, reporting and system changes.
- Coordinated **ERP** implementation activities, including business requirement gathering, process mapping, vendor/development follow-up, user testing and the rollout of system changes across departments.
- Developed and maintained workflow automations using **SharePoint**, **Power Automate** and **Excel** to reduce manual document handling, standardize recurring processes and improve data consistency.

CloudyFlex - Zoho Official Partner (CRM Turn-Key Consultancy)
Zoho Back-End Developer

Istanbul, Turkey
August 2023 - June 2024
August - December 2022

- Communicated with clients to adapt to rapidly changing needs and designed appropriate Zoho workflows.
- Completed back-end development using **Deluge** and **JavaScript**, working closely with team members.
- Developed and optimized **API** connections to seamlessly integrate multiple platforms and automate actions, improving work efficiency.
- Improved the efficacy of already existing back-end functionality, using online documentation to create up-to-date code that is change friendly.
- Wrote documentation for **Deluge** and **JavaScript** back-end code.

KPMG
Cyber Security Consulting Intern

Istanbul, Turkey
May - August 2021

- Translated documentation from Turkish to English.
- Observed and participated in meetings with clients and transcribed meeting notes.
- Analyzed compliance with global Cyber Security laws.
